Casino aggregation

Make your online success story happen today!

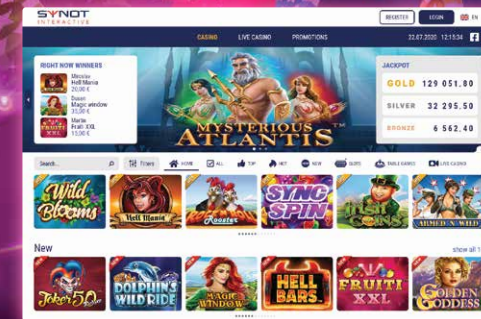

Casino aggregation

SYNOT Interactive can help you make your own successful online casino. Our solution will make it easier for you from the very first steps to create a brand that works with safety, stability, reliability and responsibility.

- Complete tailored solution for your casino
- The solution to open your own online and mobile casino
- Portfolio of 5 000+ games from 50+ game providers... and still counting...
- Possibility of smooth 3rd party wallet integration
- Flexible delivery meeting the requirements and needs of operators
- Various ways of integration
- Casino Tournaments, Bonus, Loyalty, Free games and Jackpot across all game providers and game titles
- Back office app for full control over the casino
- Integration API suite for custom solution

SYNOT Interactive is a software provider with many years of experience that focuses on delivering a modular and API-driven product suite. The company offers a variety of services, including casino content aggregator and integration platform.

BONUS SYSTEM

Boost your players' sessions and keep them logged in. Boost your options of retention. The bonus system offers easy configuration of a wide range of casino bonuses in minutes. Pick the right reward for your players and surprise them with several options: Free spins, Cashback, Deposit Bonus, Win Boost and more.

TOURNAMENTS

Create an exclusive competitive environment where players want both to win the game and to beat the others. Real-time tournaments with leaderboards and various requirements of the win increase players' engagement. Operators can easily set all tournament parameters within few minutes.

JACKPOT

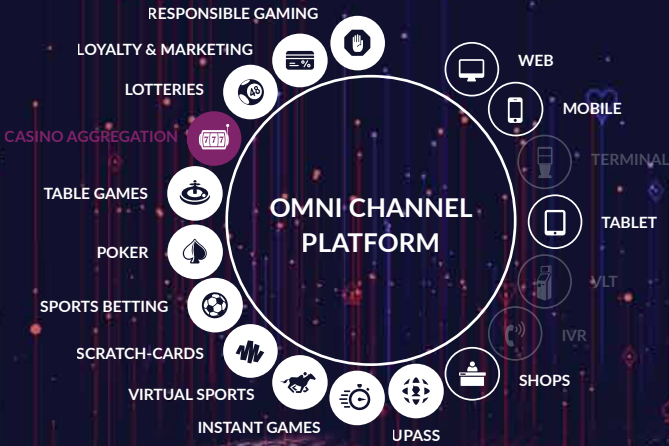

Attract players with the good old jackpot!
The platform enables maximum configurability for operators, offering multiple options, contributions and prize setups. It can tailor the user interface to match its casino brand.

With the variety of providers, we offer a wide range of games from the latest and most popular slots to live casino table and card games and more. It allows our clients to provide an online casino with a large portion of entertainment to their players.

Additionally, most games are playable across all platforms – desktop, mobile, tablet – and are multilingual. Moreover, you can highlight games on your site, create custom game categories, review reports on the most popular and profitable games on your site, and add new games to your casino with a few simple clicks. You can do all of that thanks to our Lobby management feature.
